

Pensi Carbon stretcher

36931

Pensi Carbon is a lightweight multifunctional stretcher designed for ambulances and other vehicles approved for stretcher transport. Professional care or transport personnel can move the patient outside the vehicle and transport inside the vehicle when locked into approved fastening system, for instance Ergomy Total.

It has adjustable back support, head support and leg raise to enable different treatment positions. It also has big Ø200mm wheels to help move the patient in rough terrain and lockable pull-out handles in both end of the stretcher to be used for carrying.

Stretcher can be straightened to low position to allow the loading of a laying casualty or it can be raised to higher position where the support leg and rear end of the stretcher are folded down.

Technical details	Length (cm)	Width (cm)	Height (cm)
Basic stretcher position	197	57	19
Transport position	197	57	63
Weight: appr. 29 kg (without accessories)
